

Automation Notes 2005-5

Yourway Version 15.1a

There is a program problem with the High Point reports in versions **15.1**. The totals for the swimmers are incorrect. Version **15.1a** corrects the totals in the High Point report.

Version **15.1a** installation software can be downloaded from the NVSL website by going to the League Documents and looking in the Yourway folder. There are two install packages: one is the executable zip file (NVSL151a.exe), which will expand to the four required installation files; the other is a zip file. Some Internet Service Providers (ISP's) do not allow downloading of the EXE files as a precaution for virus protection. If this is the case try downloading the zip file (NVSL151a.zip).

The install instructions are on the NVSL website under League Documents and in the Yourway folder.

If you download the zip file, you will need an UnZip program such as WinZip (www.WinZip.com) to use the zip file.

If anyone has difficulty downloading the file contact Doug Firman (firmand@aoll.com).

If anyone has questions on installing the software contact Dave Bryant (703-591-2064) or Chris Farley (703-243-1779).
