

Automation Notes 2009-4

Automation Notes:

These notes are written primarily for Division Data Coordinators to highlight automation related items. The notes can be freely distributed to their respective teams as required. Unless otherwise noted, "data coordinator" refers to the division data coordinator as opposed to team data personnel. A copy will be maintained on the NVSL web site in the Automation Notes – 2009 folder of Documents.

Hy-Tek Team Manager & Meet Manager:

1. Updated Divisional procedures have been posted to the document center at NVSL>Hy-Tek>documentation, file name is "Procedures for Divisionals - NVSLDivisionalProceduresV2.pdf". The significant changes are: 1) emphasizing that all A meets need to be tagged as such in TM and that only A meet times for the current season are selected for seeding, 2) description of how to use custom times for 8U fly and IM seeding in accordance with rule 6(c) and, 3) reminder that meet templates are now backup files that need to be restored vice opened.
2. Divisionals are coming up fast (7/25) and the All Star seeding meeting is the same evening. Send meet backup files as soon as possible to automation4nvsl@earthlink.net,

firmmand@aol.com, and jtmattis@cox.net

(note: this is a correction to Joe Mattis' email from the Relay Carnivals). DO NOT post results to the web, the league will do so after the seeding meeting. Division Coordinators: bring a flash drive with the divisional meet backup file to the seeding meeting in case the email is not received and/or there are issues with the file.

3. All team Hy-Tek related issues and questions should first be reported to the Division Data Coordinator for resolution. If they are unable to resolve the problem, A-meet issues will be handled by Kurt Willstatter <automation4nvsl@earthlink.net> and B-meet issues will be handled by Dan Joyce <dojgeg@verizon.net>.

NVSL Web Site

1. We've continued to have technical difficulties with the league leaders queries due to a couple teams not being correctly loaded into the schedules. These problems have been resolved, and hopefully will not recur with the divisional results and individual All Star results.

Other Notes

1. Thanks for getting Relay Carnival results in rapidly and helping make that meet a huge success.
2. Thanks also for all the help this season in keeping data accurate and current.
